There is much to learn about the novel coronavirus that causes [coronavirus disease 2019](#) (COVID-19). Based on what is currently known about the novel coronavirus and similar coronaviruses that cause SARS and MERS, spread from person-to-person with these viruses happens most frequently among close contacts (within about 6 feet). This type of transmission occurs via respiratory droplets. On the other hand, transmission of novel coronavirus to persons from surfaces contaminated with the virus has not been documented. Transmission of coronavirus occurs much more commonly through respiratory droplets than through fomites. Current evidence suggests that novel coronavirus may remain viable for hours to days on surfaces made from a variety of materials. Cleaning of visibly dirty surfaces followed by disinfection is a best practice measure for prevention of COVID-19 and other viral respiratory illnesses in households and community settings.

COVID – 19 Pricing Per Square Foot

Level One: \$1.35 - 1.65 Per Sqft.

Precautionary measures for business facilities, non-residential/residential, or any personal property with no known suspected or confirmed coronavirus disease. Disinfecting air with a wet fogging process is conducted twice daily by trained Cavalry technicians using a valid EPA registered disinfectant. Cavalry Technicians will use proper PPE and disinfecting practices per CDC.

Level Two: \$3.25 - \$6.25 Per Sqft

Facilities, businesses, residents or public spaces with the known exposure or person with the infectious disease inside the building will require a detailed disinfecting of all porous and non-porous surfaces. Disinfecting air with a wet fogging process and surface cleaning is conducted by trained Cavalry technicians using a valid EPA registered disinfectant. Cavalry Technicians will use proper PPE and disinfecting practices per CDC.

*Pricing is based on the complexity of facility, layout and contents.
